What is Foot printing?

Foot printing is the first step of any attack on information systems in which an attacker collects information about a target network for identifying various ways to intrude into the system

Types of Foot printing?

Passive Foot printing –

Direct information without direct interaction

Active Foot printing-

Direct information with direct interaction

Tool used-

1. Netcraft –

It is a website for finding information of subdomains,

Go to google -> find netcraft.com -> more resources -> go on resources -> search dns -
>accept the cookies ->Microsoft.com

searchdns.netcraft.com/?restriction=site+contains&host=microsoft.com&position=limited

netcraft

"Micro-Soft," short for micro-computer software.^{[18][19]} In August 1977, the company formed an agreement with ASCII Magazine in Japan, resulting in its first international office of ASCII Microsoft.^[20] Microsoft moved its headquarters to Bellevue, Washington, in January 1979.^[17]

Microsoft entered the operating system (OS) business in 1980 with its own version of Unix called Xenix,^[21] but it was MS-DOS that solidified the company's dominance. IBM awarded a contract to Microsoft in November 1980 to provide a version of the CP/M OS to be used in the IBM Personal Computer (IBM PC).^[22] For this deal, Microsoft purchased a CP/M clone called 86-DOS from Seattle Computer Products which it branded as MS-DOS, although IBM rebranded it to IBM PC DOS. Microsoft retained ownership of MS-DOS following the release of the IBM PC in August 1981. IBM had copyrighted the IBM PC BIOS, so other companies had to reverse engineer it in order for non-IBM hardware to run as IBM PC compatibles, but no such restriction applied to the operating systems. Microsoft eventually became the leading PC operating systems vendor.^{[23][24]} 210 The company expanded into new markets with the release of the Microsoft Mouse in 1983, as well as with a publishing division named Microsoft Press.^[13] 232 Paul Allen resigned from Microsoft in 1983 after developing Hodgkin's lymphoma.^[25] Allen claimed in *Idea Man: A Memoir by the Co-founder of Microsoft* that Gates wanted to dilute his share in the company when he was diagnosed with Hodgkin's disease because he did not think that he was working hard enough.^[26] Allen later invested in low-tech sectors, sports teams, commercial real estate, neuroscience, private space

Google Hacking Database-

It is used for searching and creating complex search engines in order to extract sensitive or hidden information that helps attackers to find the vulnerable targets

<https://www.exploit-db.com/google-hacking-database>

The screenshot displays the Exploit Database Google Hacking Database interface. The page title is "Google Hacking Database". It features a sidebar with navigation icons and a main content area with a table of search results. The table has columns for "Date Added", "Dork", "Category", and "Author". The results list various search queries and their corresponding categories and authors.
